PROFESSIONAL SUMMARY

Full-stack engineer and technical lead with production experience building AI-integrated applications and managing multi-site web ecosystems. Led development across 6+ enterprise sites and managed a cross-functional team of 3–4 developers at Flo Labs. Currently a Software Engineer at Rocket Park, specializing in Craft CMS architecture and MCP (Model Context Protocol) server integrations. B.S. in Information Technology (3.98 GPA, Dean's List) from Capella University. Core strengths in React/Next.js, AI integration, developer tooling, and accessibility.

TECHNICAL EXPERTISE

Languages & Frameworks: JavaScript, TypeScript, React, Next.js, Java, Spring Boot, Python, Node.js

Frontend & Design: Tailwind CSS, Craft CMS, Twig, Figma, Responsive Design, Component Architecture, WordPress, Canva

AI & Integration: OpenAI GPT-4, Claude API, MCP (Model Context Protocol), Whisper API, Amazon Transcribe, Google AI Studio

Infrastructure: Firebase, Supabase, Vercel, Docker, Git/GitHub, MySQL, MongoDB, Redis, Railway, Strapi, Playwright, WebGPU

Leadership & Process: Agile/Scrum, Technical Mentorship, Architecture Planning, Workflow Automation, Code Review

PROFESSIONAL EXPERIENCE

Software Engineer

September 2025 – Present

Rocket Park

- Execute core version upgrades, plugin updates, and infrastructure improvements across multiple client Craft CMS sites
- Built MCP (Model Context Protocol) server wrapper enabling AI assistants to query and interact with Craft CMS content directly, bridging CMS data with AI-powered workflows
- Translate Figma designs into production-ready Craft templates using Twig, Tailwind CSS, and modular component architecture
- Design reusable component patterns that balance design consistency with content editor flexibility
- Collaborate with design and engineering teams to refine content models and improve CMS authoring workflows

Design Team Lead & Software Engineer

September 2024 – January 2026

Flo Labs (formerly Flomad)

Led technical strategy and development for a portfolio of 6 production sites serving AI/robotics ventures, educational programs, and research initiatives. Managed cross-functional team of 3–4 developers, WordPress specialists, and SEO interns.

Technical Leadership & Architecture

- Architected and deployed complete redesign of Flo Labs web ecosystem (flobabs.international, flobabsrd.com, CAIPO.ai, FloStudios.ai, MoodChanger.ai, RoboCollective.ai) using React/Next.js with unified design system
- Led enterprise-level overhaul of AI Travel Planner from proof-of-concept to production platform, refactoring 100+ files and implementing scalable architecture
- Designed and implemented 22+ specialized AI prompt systems and 18+ AI functions for multi-modal travel planning (budget optimization, accessibility features, emergency assistance)
- Built comprehensive testing infrastructure with 270 frontend tests and 12 backend tests, establishing CI/CD best practices
- Started implementing Strapi CMS and Railway into production websites

Product Development & Integration

- Developed AI Travel Chatbot integrating GPT-4, Whisper API, and Mapbox (then Google Maps) for real-time geolocation-aware recommendations with speech-to-text capabilities
- Implemented Firebase Authentication and user management system for mobile app access across multiple products

- Integrated WebSocket-driven real-time updates for responsive user experiences

Team & Process Management

- Mentored and coordinated 3+ developers and designers, conducting code reviews and providing technical guidance
- Automated internal workflows with Zapier, increasing operational efficiency by ~40%
- Authored technical documentation for onboarding, debugging, and platform scaling
- Collaborated with client stakeholders including Fuller Youth Institute and Bootcamp University on conversion optimization and technical strategy

Software Engineer

August 2024 – November 2024

Sirius

- Planned, designed, and helped implement scheduling, payroll, and check-in features for Wisdom workforce mobile app (React Native)
- Improved time-tracking reliability and reduced user-reported issues through systematic testing and debugging

EDUCATION

Bachelor of Science in Information Technology

March 2026

Capella University | GPA: 3.98/4.0

Specialization: Software Development | Concentration: Web Development

Honors: Dean's List (All Quarters), Honors Pathway Certification

SELECTED PROJECTS

elizabethannstein.com — Interactive 3D galaxy portfolio showcasing 84+ projects across 6 galaxies. Built with Next.js, Three.js, GSAP, and Playwright e2e tests.

Rocket Vitals — Scan-first website QA tool that crawls pages and delivers prioritized reports across 200+ checks including accessibility, performance, SEO, and security.

Repro-in-a-Box — Production-grade automated bug detection with 10 detectors and 215+ tests. Records HAR files, validates reproducibility, and integrates with Claude Desktop via MCP.

Specter — Codebase health CLI tool built as a GitHub Copilot plugin. Analyzes structural complexity, dependency risk, and code churn through AST parsing and git history. Submitted for the DEV.to GitHub Copilot CLI Challenge 2026.

MCP Wrapper for Craft CMS — Model Context Protocol server that dynamically generates AI-queryable tools from Craft CMS GraphQL schemas, enabling AI assistants to read and interact with CMS content in real time. Built at Rocket Park for production use.

Consent Compass — URL-based consent scanning tool that generates evidence-first privacy compliance reports. Detects banners, pre-consent cookies, and measures friction.

StoryVision — Text-to-visual story app that uses Claude API for scene extraction and Hugging Face models for AI image and video generation, transforming book text into interactive visual narratives.

ADDITIONAL EXPERIENCE

Bartender | *Hugo's Restaurant*

2013 – Present

Manage high-volume service environment (30–50 customers per shift) requiring rapid prioritization, stakeholder management, and composure under pressure.
